PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Java Programming Language. Developed practical Java applications with a strong foundation in Data Structures and Algorithms and problem-solving. Familiar with JDBC and PostgreSQL for developing database-driven applications.

EDUCATION

SB Jain Institute of Technology, Management & Research 2023 – 2027
B.Tech in Computer Science & Engineering (CGPA: 8.76) *Ongoing (4th Year)*

Tejaswani Junior College 2023
Higher Secondary Certificate (HSC) *88.50%*

Wonderland High School 2021
Secondary School Certificate (SSC) *61%*

EXPERIENCE

Revat Network | C/C++ Training Program Dec 2023 – Feb 2024

- Completed hands-on training in C and C++ programming fundamentals.
- Practiced procedural and object-oriented programming concepts through coding assignments.

UptoSkills | Python Development Intern Oct 2026 – Present

- Onboarding intern currently building a working foundation in Git and GitHub for collaborative, version-controlled development.
- Set to begin hands-on project work as part of the development team starting the following week.

PROJECTS

MovieRelay Java, Spring Boot, TDLib (MTProto), H2, JavaScript (AI-assisted implementation)

- Self-Hosted Movie Streaming Platform
- Developed a full-stack media platform's architecture, data flow, and features through iterative design and testing, using AI-assisted development to build the Spring Boot backend and custom video player.
- Designed byte-range streaming so playback can start and seek within files that are still downloading, instead of waiting for the download to finish.
- Resolved a session-identifier bug causing silent data corruption — root-caused the issue through hands-on testing, defined the fix, and verified it worked.
- Validated the app across laptop and mobile over a private network, confirming concurrent downloads, playback resume, and library management all worked correctly.

JVM Memory Visualizer Java, JavaFX, Maven

- Created a JavaFX desktop application that simulates JVM memory execution and object lifecycle.
- Delivered stack/heap visualization, reference tracking, garbage collection simulation, and string pool management.
- Built a parser and simulation engine to generate step-by-step JVM memory snapshots.

Gym Management System Java, JavaFX, JDBC, Maven, PostgreSQL

- Designed and built a desktop Gym Management System using Java, JavaFX, JDBC, Maven and PostgreSQL.
- Built role-based authentication and JDBC-based database connectivity.
- Delivered modules for membership, attendance, payments and reporting.

SKILLS

Languages:	Java, C
Database:	PostgreSQL
Java Technologies:	JDBC, Maven
Core Concepts:	OOP, Data Structures & Algorithms, Problem-Solving
Developer Tools:	Git, GitHub, IntelliJ IDEA, VS Code
Soft Skills:	Communication, Teamwork
